

Open-rank faculty position in Econometrics/Statistics at ESSEC Business School, Paris

The [Department of Information systems, Decision sciences and Statistics](#) (IDS) at ESSEC Business School invites applications for a permanent full-time faculty position in Econometrics/Statistics at its Cergy-Pontoise (greater Paris) campus **starting September 2023**. Please submit your application by **December 15, 2022** to receive full consideration.

We are looking for candidates whose research relates to econometrics, statistics or related fields and can be published in top journals in econometrics and statistics. The selected candidate will have a strong international research focus and their main objective will be the production of impactful and high-quality academic publications to help consolidate and develop the reputation and expertise of ESSEC.

Support to research is an important part of the ESSEC policy and faculty members enjoy an attractive incentive-based research environment. Rank of appointment is open, with a preference for junior candidates including PhD students expected to graduate before September 2023, but we will consider candidates at all seniority levels. Salary will be commensurate with qualifications and experience and are competitive at the international level.

To be considered, candidates should hold a Ph.D. in econometrics, statistics, applied probability or related fields and should show evidence of excellence in research and, for senior candidates, in teaching.

[Applicants should submit their application via this link.](#)

The application package should include, in a single pdf file:

- a cover letter
- a CV containing a short description of research and teaching interests
- a complete list of publications
- a research statement
- a teaching statement, and teaching evaluations
- contact information for at least three reference letters.

Questions about the position may be directed to Pierre Jacob (jacob@essec.edu), Olga Klopp (klopp@essec.edu) or Mohamed Ndaoud (ndaoud@essec.edu).

The search for candidates opens with this announcement and continues until the position is filled so we may accept applications posterior to the December 15, 2022 deadline. We aim to conduct interviews early in 2023.

ESSEC offers a dynamic and stimulating research and teaching environment. Founded in 1907, ESSEC (Ecole Supérieure des Sciences Economiques et Commerciales) is one of the celebrated 'Grandes Ecoles' in France. ESSEC Business School has campuses in Paris, Singapore (since 2006) and Rabat (since 2017), offering mostly graduate level training in business administration (masters in management, MBA, executive MBA, specialized masters, PhD), with a specific emphasis on quantitative tools in its pedagogy and research, as well as executive education. ESSEC is known for its international orientation and has partnerships with prominent institutions worldwide. ESSEC programs are regularly ranked among the best in Europe (FT, The Economist, QS...). The current strategy of ESSEC makes data science, and the management of artificial intelligence & technology, one of the three pillars of the school, through the creation of the [ESSEC Metalab for Data, Technology of Society](#).

The IDS department at ESSEC Business School consists of 24 full time faculty, among which 10 members for the statistics group (3 in econometrics and 7 in statistics & applied probability, including two new members joining our Paris and Singapore campuses in January 2023). It includes various chairs, among which the Accenture chair in Strategic Business Analytics, and two research centers: the Center of Research in Econo-finance and Actuarial sciences on Risk and the Research Cluster "Operations Management & Operations Research ". [A list of department members can be found here](#). Our faculty is involved in the PhD program at ESSEC which includes a concentration in Data Analytics. We teach at the undergraduate, graduate and executive levels, for example in the Master in Management (Grande Ecole) and the ESSEC-CentraleSupélec Master in Data Sciences & Business Analytics and newly created ESSEC-CentraleSupélec Bachelor in AI, Data & Management Sciences.
